To The Honorable Judge Thomas B. Lindberg:

Wed. June 9, 2010, late at night pondering

In the opening statements to the courts the Prosecution and Defense lawyers mentioned a bicycle and shoe print that was pertinent to this case.

In his sworn testimony the first Yavapai County Officer stated he took pictures which was shown to the court and viewed by the jury, these pictures were of a bicycle track and a shoe print. The officer stated that the pictures were taken at the trail head gate, off of Glensandra Dr. The officer stated that there were other tracks in the open space beyond the locked gate where he found the bicycle track including horse tracks and other foot prints.

I understand the time line of the prior events up to but not this moment of time. This particular incident at this particular time makes me a bit confused!

Question, what event triggered the officer to only take pictures of a bicycle track and of a particular shoe print, was there bicycle tracks or a shoe print in or near the home of the victims house, or did the neighbor mentioned a bicycle when he talked to the sergeant who is now on the stand giving testimony?

This bicycle and how it entered at this time line of events causes me to ponder on this issue and I do not want to lose focus on trying to figure out who or what made him focus on bicycle and shoe prints 300 to 400 yards away from the victims house? Maybe I missed an important time statement!

Maybe the sergeant ordered him to look for bicycle track, how she knew at this particular time about a bicycle is still my question.
